[4] The amount of waste in 2024 for certain types has changed compared to 2023 due to the following reasons:

- In 2024, the reporting scope of waste performance has been expanded to include additional establishments, such as Mixing Powder Plant and Bakery Plant.

- Hazardous waste disposed of through recycling has significantly decreased, as the LPG Cylinder refurbishing Plant in Songkhla Province has not yet implemented recycling for hazardous waste disposal in 2024.

- Hazardous waste disposed of through incineration (without energy recovery) has significantly increased, as the LPG Cylinder Refurbishing Plant in Phra Nakhon Si Ayutthaya Province started operations and began collecting data in Q3/ 2023. As a result, hazardous waste from this facility was not disposed of in 2023 and was instead sent for disposal in 2024.

- Non-hazardous waste disposed of through recycling has significantly increased, as FitAuto began collecting non-hazardous waste data in 2024, and the LPG Cylinder Refurbishing Plant in Phra Nakhon Si Ayutthaya Province started operations and began collecting data in Q3/2023.
